SUBJECT INDEX

Absorption spectroscopy
spectrokinetic determination of fluorosulphate radical absorption cross-sections, 293
Acetonitrile–water mixtures
electron transfer in the $Ru(bpy)_3^{2+}$–MV^{2+} system in acetonitrile–water mixtures. Dependence on transfer distance, ionic strength and temperature, 179
Acetoxyphenyl–anthracene
triplet-state-related photophysical properties of 9-acetoxy-10-phenylanthracene derivatives, 207
Alkanes
the application of perfluoroalkanes as solvents in spectral, photophysical and photochemical studies, 87
Alkyl nitrates
atmospheric photochemistry of alkyl nitrates, 281
Aminopropyl silica gel
pressure effect on the fluorescence decay of erythrosin bonded to an aminopropyl silica gel particle — measurements under a microscope, 237
Anthryl compounds
fluorescence studies on some anthryl compounds, 327
Artificial photosynthesis
artificial photosynthesis, 41
Atmospheric chemistry
atmospheric chemistry — progress and surprises in the past 5 years, 29
atmospheric photochemistry of alkyl nitrates, 281

Bacterial photosynthetic reaction centre
artificial photosynthesis, 41
Benzene
a photochemical study of an O-methylated α-carbonyl β-1 lignin model dimer: 1,2-di(3′,4′-dimethoxyphenyl)ethanone (deoxyveratroin), 451
γ-irradiation of benzene–water mixture in perfluorocarbon polymer film at 77 K, 437
Benzil
electronic spectra of benzil in solution and thin film, 245
1-(4-Benzoylphenyl)-2-propen-1-one
preparation and photochemical properties of polymers containing 1-(4-benzylphenyl)-2-propen-1-one or 1-(4-benzoylphenyl)-2-propen-1-one structural units, 411
1-(4-Benzylphenyl)-2-propen-1-one
preparation and photochemical properties of polymers containing 1-(4-benzylphenyl)-2-propen-1-one or 1-(4-benzoylphenyl)-2-propen-1-one structural units, 411
Bioluminescence
chemiluminescence and bioluminescence, 21

β-Carbolines
photochemical reaction of β-carbolines in carbon tetrachloride–ethanol mixtures, 341
Carbon tetrachloride
photochemical reaction of β-carbolines in carbon tetrachloride–ethanol mixtures, 341
Cellulase
biomass photochemistry XIV: photosensitized pre-treatment of cellulose and its role on cellulase efficiency, 469
Cellulose
biomass photochemistry XIV: photosensitized pre-treatment of cellulose and its role on cellulase efficiency, 469
Chemiluminescence
chemiluminescence and bioluminescence, 21
Chromophore
photoreduction of methyl viologen using disodium tetraphenanthroporphyrazine as photosensitizer, 391
Complexation
spectroscopic investigation of uranium complexation in the reversed micellar system HDEHP–*n*-heptane–water, 401

Elsevier Sequoia/Printed in The Netherlands

template photopolymerization of methylmethacrylate on polyvinyl acetate, 443
Coordination compounds
photochemistry and luminescence of coordination compounds, 55
Creatinine
pulsed laser photolysis of the $PtCl_6^{2-}$–creatinine system in methanol, 371
7-Cyano-10-hydroxyethylisoalloxazine
photochemical N-10 dealkylation of 7-cyano-10-hydroxyethylisoalloxazine, 355
7-Cyanoalloxazine
photochemical N-10 dealkylation of 7-cyano-10-hydroxyethylisoalloxazine, 355
β-Cyclodextrine
study of the fluorescence of uranyl ions as a function of pH and in the presence of β-cyclodextrine, 197

Dealkylation
photochemical N-10 dealkylation of 7-cyano-10-hydroxyethylisoalloxazine, 355
Deoxyveratroin
a photochemical study of an O-methylated α-carbonyl β-1 lignin model dimer: 1,2-di(3′,4′-dimethoxyphenyl)ethanone (deoxyveratroin), 451
Desilylation
desilylation by ether cleavage, 359
Deuterium
the IR laser photochemistry of monosilane–deuterium mixtures, 301
Diffusional quenching
photochemical reaction of β-carbolines in carbon tetrachloride–ethanol mixtures, 341
Disodium tetraphenanthroporphyrazine
photoreduction of methyl viologen using disodium tetraphenanthroporphyrazine as photosensitizer, 391
Dynamic quenching
fluorescence studies on some anthryl compounds, 327

Electron transfer
desilylation by ether cleavage, 359
electron transfer in the $Ru(bpy)_3^{2+}$–MV^{2+} system in acetonitrile–water mixtures. Dependence on transfer distance, ionic strength and temperature, 179
intermediates in the photoreduction of $PtCl_6^{2-}$ in methanol, 379
photochemical reaction of β-carbolines in carbon tetrachloride–ethanol mixtures, 341
Enzymatic hydrolysis
biomass photochemistry XIV: photosensitized pre-treatment of cellulose and its role on cellulase efficiency, 469
Erythrosin
pressure effect on the fluorescence decay of erythrosin bonded to an aminopropyl silica gel particle — measurements under a microscope, 237
Ethanol
a photochemical study of an O-methylated α-carbonyl β-1 lignin model dimer: 1,2-di(3′,4′-dimethoxyphenyl)ethanone (deoxyveratroin), 451
photochemical reaction of β-carbolines in carbon tetrachloride–ethanol mixtures, 341
Ether cleavage
desilylation by ether cleavage, 359
Ethyl acetate
the photocycloaddition of 4-methoxy-1-naphthonitrile and 2-methoxy-1-naphthonitrile with acrylonitrile and 3,4-dihydro-2H-pyran: facile additions in sunlight, 429
Ethyl chloride
primary processes in the 163.3 nm photolysis of gas-phase ethyl chloride, 269
Excitation
effect of excitation wavelength on the photophysics of fluorescein–anthracenemethyl ester, 229

Ferrocyanide ion
hydrogen generation in photolysis of ferrocyanide ion, 163
Flash photolysis
kinetics of the Br_2–CH_3CHO photochemical chain reaction, 141
photochemistry of the $PtCl_6^{2-}$ complex in methanol solution, 167
preparation and photochemical properties of polymers containing 1-(4-benzylphenyl)-2-propen-1-one or

1-(4-benzoylphenyl)-2-propen-1-one structural units, 411
pulsed laser photolysis of the $PtCl_6^{2-}$–creatinine system in methanol, 371
spectrokinetic determination of fluorosulphate radical absorption cross-sections, 293
study of the fluorescence of uranyl ions as a function of pH and in the presence of β-cyclodextrine, 197
Fluorescein–anthracenemethyl
effect of excitation wavelength on the photophysics of fluorescein–anthracenemethyl ester, 229
Fluorescence
pressure effect on the fluorescence decay of erythrosin bonded to an aminopropyl silica gel particle — measurements under a microscope, 237
fluorescence studies on some anthryl compounds, 327
kinetics of the Br_2–CH_3CHO photochemical chain reaction, 141
Fluorosulphate
spectrokinetic determination of fluorosulphate radical absorption cross-sections, 293
Fluorometry
study of the fluorescence of uranyl ions as a function of pH and in the presence of β-cyclodextrine, 197

Gas phase
the gas phase UV absorption spectrum of CH_3O_2 radicals: a reinvestigation, 133

n-Heptane
spectroscopic investigation of uranium complexation in the reversed micellar system HDEHP–*n*-heptane–water, 401

Industrial synthesis
photochemistry in industrial synthesis, 81
γ-Irradiation
γ-irradiation of benzene–water mixture in perfluorocarbon polymer film at 77 K, 437

Lasers
laser photochemistry: some recent advances, 17
lasers in photochemistry, 13
Lignin-free fibres
a photochemical study of an O-methylated α-carbonyl β-1 lignin model dimer: 1,2-(3′,4′-dimethoxyphenyl)ethanone (deoxyveratroin), 451
Luminescence
photochemistry and luminescence of coordination compounds, 55
study of the fluorescence of uranyl ions as a function of pH and in the presence of β-cyclodextrine, 197

Mercuric chloride
a new compound composed of tris-(2,2′-bipyridine)ruthenium(II) and mercuric chloride and its photochemical characteristics, 155
Methanol
intermediates in the photoreduction of $PtCl_6^{2-}$ in methanol, 379
photochemistry of the $PtCl_6^{2-}$ complex in methanol solution, 167
pulsed laser photolysis of the $PtCl_6^{2-}$–creatinine system in methanol, 371
Methyl viologen
photoreduction of methyl viologen using disodium tetraphenanthroporphyrazine as photosensitizer, 391
Methylmethacrylate
template photopolymerization of methylmethacrylate on polyvinyl acetate, 443
Methylperoxy radicals
the gas phase UV absorption spectrum of CH_3O_2 radicals: a reinvestigation, 133
Molecular elimination
primary processes in the 163.3 nm photolysis of gas-phase ethyl chloride, 269
Molecular rotation
modification of photochemical reactivity by zeolites: arrested molecular rotation of polyenes by inclusion in zeolites, 259
Monosilane
the IR laser photochemistry of monosilane–deuterium mixtures, 301

Ozone depletion
atmospheric chemistry — progress and surprises in the past 5 years, 29

Perfluoroalkanes
the application of perfluoroalkanes as solvents in spectral, photophysical and photochemical studies, 87
Perfluorocarbon polymer
γ-irradiation of benzene–water mixture in perfluorocarbon polymer film at 77 K, 437
Perylene
the temperature dependence of photophysical processes in perylene, tetracene and some of their derivatives, 215
Photochemical chain reaction
kinetics of the Br_2–CH_3CHO photochemical chain reaction, 141
Photocycloaddition
the photocycloaddition of 4-methoxy-1-naphthonitrile and 2-methoxy-1-naphthonitrile with acrylonitrile and 3,4-dihydro-2H-pyran: facile additions in sunlight, 429
Photodegradability
polymers with enhanced photodegradability, 73
Photodissociation dynamics
laser photochemistry: some recent advances, 17
Photoelectrochemical cells
photoelectrochemical cells — a review of progress in the past 10 years, 45
Photoelectrolysis
photoelectrochemical cells — a review of progress in the past 10 years, 45
Photolysis
hydrogen generation in photolysis of ferrocyanide ion, 163
Photophysics
effect of excitation wavelength on the photophysics of fluorescein–anthracenemethyl ester, 229
photophysics, 9
photophysics of doubly-charged quinine: steady state and time-dependent fluorescence, 313
the temperature dependence of photophysical processes in perylene, tetracene and some of their derivatives, 215
triplet-state-related photophysical properties of 9-acetoxy-10-phenylanthracene derivatives, 207
Photopolymerization
present trends in photopolymerization, 67
template photopolymerization of methylmethacrylate on polyvinyl acetate, 443
Photoreduction
intermediates in the photoreduction of $PtCl_6^{2-}$ in methanol, 379
photoreduction of methyl viologen using disodium tetraphenanthroporphyrazine as photosensitizer, 391
Physical organic photochemistry
physical organic photochemistry, 63
Platinum
photochemistry of the $PtCl_6^{2-}$ complex in methanol solution, 167
Platinum complex
intermediates in the photoreduction of $PtCl_6^{2-}$ in metahnol, 379
pulsed laser photolysis of the $PtCl_6^{2-}$–creatinine system in methanol, 371
Polyenes
modification of photochemical reactivity by zeolites: arrested molecular rotation of polyenes by inclusion in zeolites, 259
Polymers
polymers with enhanced photodegradability, 73
preparation and photochemical properties of polymers containing 1-(4-benzylphenyl)-2-propen-1-one or 1-(4-benzoylphenyl)-2-propen-1-one structural units, 411
Polyvinyl acetate
template photopolymerization of methylmethacrylate on polyvinyl acetate, 443
Pressure effect
pressure effect on the fluorescence decay of erythrosin bonded to an aminopropyl silica gel particle — measurements under a microscope, 237

Quinine
photophysics of doubly-charged quinine: steady state and time-dependent fluorescence, 313

Radiation curing
present trends in photopolymerization, 67
Radical reaction
primary processes in the 163.3 nm photolysis of gas-phase ethyl chloride, 269

Rare gases
the application of perfluoroalkanes as solvents in spectral, photophysical and photochemical studies, 87
Rate laws
physical organic photochemistry, 63
Reactive intermediates
physical organic photochemistry, 63

Small molecules
photochemistry of small molecules: three cases resurveyed, 1
Sodium nitrite
biomass photochemistry XIV: photosensitized pre-treatment of cellulose and its role on cellulase efficiency, 469
Solute–solvent interactions
the application of perfluoroalkanes as solvents in spectral, photophysical and photochemical studies, 87
Structure–reactivity relationships
physical organic photochemistry, 63
Sunlight
the photocycloaddition of 4-methoxy-naphthonitrile and 2-methoxy-1-naphthonitrile with acrylonitrile and 3,4-dihydro-2H-pyran: facile additions in sunlight, 429

Temperature dependence
the temperature dependence of photophysical processes in perylene, tetracene and some of their derivatives, 215
Tetracene
the temperature dependence of photophysical processes in perylene, tetracene and some of their derivatives, 215
Thin film
electronic spectra of benzil in solution and thin film, 245
Tris(2,2′-bipyridine)ruthenium(II)
a new compound composed of tris-(2,2′-bipyridine)ruthenium(II) and mercuric chloride and its photochemical characteristics, 155

Uranyl ion
spectroscopic investigation of uranium complexation in the reversed micellar system HDEHP–*n*-heptane–water, 401
Uranyl ions
study of the fluorescence of uranyl ions as a function of pH and in the presence of β-cyclodextrine, 197
UV photolysis
primary processes in the 163.3 nm photolysis of gas-phase ethyl chloride, 269

Water
γ-irradiation of benzene–water mixture in perfluorocarbon polymer film at 77 K, 437
spectroscopic investigation of uranium complexation in the reversed micellar system HDEHP–*n*-heptane–water, 401

Zeolites
modification of photochemical reactivity by zeolites: arrested molecular rotation of polyenes by inclusion in zeolites, 259
